

Design Phase

Step 1: Create the Catalog Item

First, we need to create the actual form container that employees will see in the Service Portal.

1. In your PDI, use the Filter Navigator on the left and type **Maintain Items**. Click on it.
2. Click the **New** button at the top.

Name	Short description	Active	Roles	Catalogs	Category	Price	Type	Updated
3M Privacy Filter - Lenovo X1 Carbon	Privacy Filter - X1 Carbon	true		Service Catalog	Peripherals	\$43.19	Item	2022-11-20 20:46:33
3M Privacy Filter - MacBook Pro	Privacy Filter	true		Service Catalog	Peripherals	\$42.23	Item	2022-11-20 20:46:33
3M Privacy Filter - Macbook Pro Retina	Privacy Filter	true		Service Catalog	Peripherals	\$40.31	Item	2022-11-20 16:00:00
Access	Microsoft Access	true		Service Catalog	Software	\$139.99	Item	2022-11-20 20:46:33
Acrobat	Adobe Acrobat	true		Service Catalog	Software	\$139.99	Item	2022-12-05 20:46:33
Add network switch to datacenter cabinet	This standard change template describes ...	true		Service Catalog	Network Standard Changes	\$0.00	Item	2024-05-05 15:19:59
Add/Remove users from group	Add/Remove users from group	true		Service Catalog	Services	\$0.00	Item	2022-12-05 10:17:33
Adobe Acrobat Pro	Create, edit or convert PDF files	true		Service Catalog	Software	\$0.00	Item	2022-12-05 20:46:33

3. Fill out the basic details:
 - **Name:** Employee ID Card Request
 - **Catalogs:** Service Catalog
 - **Category:** Can We Help You? (or any category you prefer, like *Facilities* or *HR*)
 - **Short description:** Submit a request for a new or replacement ID card.
4. Click **Submit** or right-click the header and click **Save**.

The screenshot shows the ServiceNow interface for editing a Catalog Item. The breadcrumb trail is "Catalog Item - Employee ID Card Request". The top navigation bar includes "All", "Favorites", "History", "Workspaces", and "Admin". The application scope is "Global". The form fields are as follows:

- Name:** Employee ID Card Request
- Application:** Global
- Catalogs:** Service Catalog
- Category:** Can We Help You?
- State:** -- None --
- Checked out:** -- None --
- Owner:** System Administrator
- Active:** ☒
- Fulfillment automation level:** Unspecified

Step 2: Add the Form Fields (Variables)

We need three specific fields. Scroll down to the **Variables** related list at the bottom of your saved catalog item and click **New** for each one:

Variable 1: Employee Name

- **Type:** Reference (This links directly to your system's user database)
- **Question (Label):** Employee Name
- **Name:** employee_name
- **Type Specifications Tab:** In the **Reference** field, look up and select User [sys_user].
- *Check the "Mandatory" box if you want to require this field. Click **Submit**.*

The screenshot shows the ServiceNow interface for creating a new Variable. The breadcrumb trail is "Variable - New Record". The top navigation bar includes "All", "Favorites", "History", "Workspaces", and "Admin". The application scope is "Global". The form fields are as follows:

- Application:** Global
- Type:** Reference
- Catalog item:** Employee ID Card Request
- Order:**
- Active:** ☒
- Mandatory:** ☐
- Read only:** ☐
- Hidden:** ☐
- Disable automatic slot fill based on user context:** ☐

The **Question** tab is selected, showing the following fields:

- * Question:** Employee Name
- * Name:** Name
- Conversational label:**
- Tooltip:**

The **Submit** button is at the bottom left.

Variable 2: Department

- **Type:** Reference
- **Question (Label):** Department
- **Name:** department
- **Type Specifications Tab:** In the **Reference** field, look up and select Department [cmn_department]. Click **Submit**.

The screenshot shows the ServiceNow 'Variable - New Record' form. The top navigation bar includes 'servicenow', 'All', 'Favorites', 'History', 'Workspaces', 'Admin', and a 'Variable - New Record' button. The right side of the header shows 'Application scope: Global' and 'Update set: Default (Global)'. The main form area is divided into two sections. The top section contains fields for 'Application' (set to 'Global'), 'Type' (set to 'Reference'), 'Catalog item' (set to 'Employee ID Card Request'), and 'Order'. To the right of these fields are checkboxes for 'Active' (checked), 'Mandatory', 'Read only', 'Hidden', and 'Disable automatic slot fill based on user context'. The bottom section is a tabbed interface with tabs for 'Question', 'Annotation', 'Type Specifications', 'Default Value', 'Auto-populate', 'Permission', and 'Availability'. The 'Question' tab is active, showing a blue header bar with the text 'Specify the Question that explains the options available to the end user when ordering the item'. Below this are input fields for '* Question' (containing 'Department'), '* Name' (containing 'department'), 'Conversational label', and 'Tooltip'. A 'Submit' button is located at the bottom left of the form.

Variable 3: Reason

- **Type:** Select Box (A dropdown list)
- **Question (Label):** Reason for Request
- **Name:** reason
- Click **Submit**.

ServiceNow Variable - New Record

Application: Global

Type: Select Box

Catalog item: Employee ID Card Request

Order:

Active: ☒

Mandatory: ☐

Read only: ☐

Hidden: ☐

Disable automatic slot fill based on user context: ☐

Question: Specify the Question that explains the options available to the end user when ordering the item

* Question: Reason for Request

* Name: reason_for_request

Conversational label:

Tooltip:

Submit

Step 3: Route the Request for Manager Approval & Automation

To handle the approvals, notifications, and tasks requested in image_be0360.png, we will use **Flow Designer**.

1. In the Filter Navigator, type **Flow Designer** and open it.
2. Click **New > Flow**. Name it Employee ID Card Request Flow and click **Submit**.
3. **Set the Trigger:**
 - Click *Add a Trigger* and select **Service Catalog**. (This means the flow starts whenever someone orders our specific catalog item)

TRIGGER

Add trigger

ACTIONS Select multiple

Add an Action, Flow Logic, or Subflow

ERROR HANDLER

If an error occurs in your flow, the actions you add here will run.

Trigger - Service Catalog

Requested Item Record

Run Start Time UTC Date/Time

Table Name Table Name

Run Start Date/Time Date/Time

Add Flow Actions:

Click **Add an Action, Flow Logic, or Subflow** for each of these steps:

1. Route for Manager Approval:

- Choose **Flow Logic > Ask For Approval**.
- **Record:** Click the data pill picker (the small square icon), choose **Trigger - Service Catalog > Requested Item Record**.
- **Rules:** Choose *Approve when anyone approves*.
- **User:** Use the data pill picker to navigate to **Trigger - Service Catalog > Requested Item Record > Requested For > Manager**. (This dynamically grabs the user's manager!).

ACTIONS Select multiple

Table: Requested Item [sc_req_item]

Include Watermark: ☒

* To: 23csb35@karpagamtech.ac.in

CC:

BCC:

* Subject: Confirmation: Your ID Card Request has been submitted

Body:
Hi, your request has been received and has been sent for manager approval.

Delete Cancel Done

2. Add a Condition Check:

- Choose **Flow Logic** > **If**. Name it If Approved.
- **Condition:** Drag the *Approval State* from the previous step and set it to **Is > Approved**.

The screenshot shows the configuration for an 'If' block. The 'Condition Label' is 'If Approved'. Under 'Condition 1', the field '3 - Ask For Ap...' is selected, followed by 'Approval St...', then 'is', and finally 'Approved'. There are 'or' and 'and' logical operators available. A button 'Add another condition set(OR)' is present. At the bottom right are 'Delete', 'Cancel', and 'Done' buttons.

3. Send a Notification after Approval (Inside the IF block):

- Choose **Action** > **ServiceNow Core** > **Send Email**.
- **Target Record:** Select your Requested Item Record.
- **To:** Drag the *Requested For* data pill.
- **Subject:** Your ID Card Request has been Approved
- **Body:** Write a quick confirmation message.

The screenshot shows the configuration for the 'Send Email' action within the 'If Approved' block. The 'Action' is 'Send Email'. Under 'Action Inputs', 'Target Record' is 'Trigger -> Requested Item ...', 'Table' is 'Requested Item [sc_req_item]', 'Include Watermark' is checked, '* To' is 'Trigger - Service C... -> Em...', 'CC' and 'BCC' are empty, and '* Subject' is 'Your ID Card Request has been Approved'. The 'Body' field contains a confirmation message: 'Hi, Good news! Your request for a new or replacement Employee ID Card has been approved by your manager. Our admin and facilities team is currently processing your request and printing your new card. You will receive another update as soon as it is ready for collection.' At the bottom right are 'Delete', 'Cancel', and 'Done' buttons.

4. Create a Task for the Admin Team (Inside the IF block):

- Choose **Action > ServiceNow Core > Create Catalog Task**.
- **Requested Item:** Select your Requested Item Record.
- **Short Description:** Fulfill Employee ID Card Request.
- **Assignment Group:** Look up and select Network or create a generic admin/facilities group in your PDI.

The screenshot shows the 'Create Catalog Task' configuration interface. At the top, the 'Action' is set to 'Create Catalog Task'. Under 'Action Inputs', the 'Table Name' is 'Catalog Task [sc_task]'. The 'Requested Item' is linked to 'Trigger -> Requested Item ...'. The 'Short Description' is 'Fulfill Employee ID Card Request'. The 'Fields' section shows 'Assignment group' and 'Network' selected. Below this, there is a 'Wait' checkbox which is checked. The 'Template Catalog Item' is set to 'Select Template Catalog Item'. At the bottom, there are two panels: 'Available' and 'Selected'. The 'Available' panel contains the text 'Select Template Catalog Item field to load variables.' The 'Selected' panel contains the text 'Create Catalog Item(s) that point to this flow and the variables on that item(s) will show here.' There are navigation arrows between these panels.

5. Click **Save** and then click **Activate** in the top right of Flow Designer.

Step 4: Test Your Project!

1. On your catalog item form, click the **Try It** button in the top right corner.
2. Fill out your name, department, and choice of reason. Click **Order Now**.
3. Open the newly created RITM (Requested Item) record to verify that the flow has successfully kicked off and is waiting for the manager's approval.
